Breaking Down Barriers - Building Up Hope

MSAA COOLING PROGRAM CATALOG

There are many products designed to help people with MS experience cooling relief. These products use different methods to create a cooling effect. These include:

- Evaporative Cooling: Products are soaked in cool water and towel dried. This activates crystals inside and evaporation lowers the temperature of the product (not recommended for humid climates);
- Ice Pack Cooling: Ice packs are frozen at 32 degrees and inserted into the product's pockets or pouches;
- Gel Pack Cooling: Gel packs are frozen at 45 degrees and inserted into the product's pockets or pouches (this is helpful if you travel and have access to a portable cooler);

This catalog divides products into two categories:

- I. Cooling Kits
- II. Cooling Accessories

Important Notes:

- This catalog is to help you see and understand the cooling products offered by MSAA. Full product descriptions are contained on the Cooling Application. **Please use the application (not this catalog) to place your order.**
- Please make your selection(s) carefully as **there are no returns or exchanges.**
- Vest sizes are based on a person's weight.
- Please call MSAA at 800-532-7667 if you have any questions.
